General Machine Maintenance for balancers

Always refer to your operator’s manual or contact Corghi USA service department for any technical questions. General maintenance should be performed at least monthly or more frequently based on usage.

- Keep the weight tray clean and free of trash and debris
- Clean the threaded shaft and cones with WD40, use caution as metal shavings may be present on the shaft from the wing nut
- Use a mild detergent sprayed on a rag to clean cabinet and weight tray
- Use approved LCD cleaner for monitor
